JAMILUR RAHMAN KHAN

+8801987044239 | jamilurrahmankhan32@gmail.com | JamilurRahmanKhan | jamilurrahmankhan
Present Address: Mohammadpur, Dhaka, Bangladesh

Software engineer building multi-role applications and real-time systems, and developing simulation/ML prototypes.

Education

B.Sc. in Computer Science & Engineering (CSE) *Oct 2021 – Feb 2026*
United International University Dhaka, Bangladesh
CGPA: 3.72 / 4.00 | 50% Scholarship (10 trimesters)

Higher Secondary Certificate (HSC), Science *2020*
Mohammadpur Govt. College Dhaka, Bangladesh
GPA: 5.00 / 5.00

Secondary School Certificate (SSC), Science *2018*
Mohammadpur Govt. High School Dhaka, Bangladesh
GPA: 5.00 / 5.00

Experience & Training

Web Development Trainee (Laravel, Vue) *Oct 2023 – Mar 2024*
BASIS BITM (BASIS Institute of Technology & Management) Dhaka, Bangladesh
[]

- Developed DealPrime e-commerce platform using Laravel, Livewire, and MySQL with an admin dashboard.
- Integrated SSLCOMMERZ (IPN) and Pathao APIs for payments and delivery workflow.
- Implemented SMS/OTP and RBAC using Spatie Permissions.
- Scored 100/100 in 108-hour training.

Projects

ShasthoAI: Telemedicine Platform with AI Health Assistant *2025*
Tech: React (Vite), TailwindCSS, Node/Express, MongoDB, Firebase Auth/Admin, Socket.IO, WebRTC, Docker [ ]
- Built multi-role telemedicine platform (patient/doctor/pharmacy/admin) with role-based access.
- Implemented appointments with doctor availability and time-off management.
- Added real-time chat and notifications using Socket.IO.
- Shipped 1:1 video calling using WebRTC with Socket.IO signaling.
- Integrated AI health assistant API with rate limiting and logging.

StudyXchange: Multi-Role Student Platform *2024*
Tech: Laravel 11, PHP 8.2+, MySQL, Blade/Tailwind, Chatify [ ]
- Built multi-role student platform with dashboards for admin, university, company, and student roles.
- Designed 53-table MySQL schema for admissions, Q&A, research, jobs, assessments, and chat.
- Implemented Q&A: tags, search, voting, and trending feed.
- Built research meeting scheduling with proposals, voting, and deterministic tie-break.

ML-based Performance Prediction and Optimization of FSO Links *2025 – 2026*
Tech: Python, NumPy, Pandas, scikit-learn, Matplotlib, Joblib [ ]
- Built ML pipeline to predict FSO BER/SNR under rain attenuation using simulation and rainfall data.
- Trained RandomForestRegressor (200 trees) on 3,000 samples ($R^2 \approx 0.993$, RMSE $\approx 4.07\times10^{-4}$).
- Integrated 2014–2024 rainfall measurements (474 samples) to model weather loss across 10–2000 m links.

FlowForge: Multi-Tenant SaaS Project Management Platform *2026*
Tech: Next.js, React, TypeScript, Tailwind CSS, Spring Boot, Spring Security, JPA, PostgreSQL, JWT [ ]
- Built a multi-tenant SaaS platform for managing workspaces, projects, tasks, members, and activity.
- Designed workspace-based authentication and authorization using Spring Security, JWT, and role/member-aware access control.
- Implemented project/member/task workflows including task assignment, status updates, and dynamic project statistics.
- Developed responsive desktop/mobile UI with overview, board, list, members, activity, workspace switching, and live deployment.

Skills

Languages: C++, Python, JavaScript, PHP, SQL
Frameworks & Tech: React, Next.js, Node.js/Express, Spring Boot, Spring Security, Laravel, Livewire, Tailwind CSS, Socket.IO, WebRTC
Databases: MySQL, MongoDB, PostgreSQL
Tools: Git, GitHub Actions, Docker, Vercel, Railway, Neon
Problem Solving: Solved 142 problems on LeetCode

Awards & Achievements

- 50% Scholarship for 10 trimesters (United International University)
- BASIS BITM certified program (Laravel & Vue): 108 hours, score: 100/100
